CURRENT LIST of MEDICAL LITERATURE

VOL. 1 December 10, 1941 No. 50

1. Anatomy, Embryology, Morphology
2. Anthropology, Ethnology
3. Bacteriology, Microbiology
4. Biology
5. Cancerology
6. Cardiology
7. Chemistry
8. Dentistry, Stomatology
9. Dietetics, Metabolism
10. Endocrinology
11. Gastroenterology
12. Genetics, Eugenics
13. Gynecology, Obstetrics
14. Histology, Cytology
15. Homeopathy, Osteopathy, etc.
16. Hospital Publications
17. Hygiene, Public Health, Sanitation
18. Immunology, Infectious Diseases
19. Industrial Medicine, Insurance
20. Jurisprudence, Criminology
21. Medical History
22. Medicine, Clinical, Internal
23. Medicine, Laboratory, Diagnosis
24. Medicine, Military and Naval
25. Medicine, Tropical
26. Medicine, Veterinary
27. Neurology, Neurosurgery
28. Ophthalmology, Optics
29. Otorhinolaryngology and Phoniatry
30. Parasitology, Entomology
31. Pathology (general)
32. Pediatrics, Child Welfare
33. Pharmacology, Pharmacy
34. Physiology
35. Psychiatry, Psychology
36. Radiology
37. Societies, Miscellaneous
38. Statistics
39. Surgery
40. Therapeutics
41. Tuberculosis
42. Urology
43. Venereology, Dermatology
44. Zoology

Privately published under the auspices of the

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

THE INDEX QUESTION

The problem of providing an index to the Current List was discussed recently (Issue No.45, Nov. 5) and suggestions in regard to it were requested. One which appears to have considerable merit has been submitted by Dr. Landauer of the Storrs Agricultural Experiment Station He suggests, since an index of the entire contents will be too costly, that an index be made of those titles only appearing in the Current List and not used in the preparation of the Quarterly Cumulative Index Medicus. Here there would be no duplications of effort and a useful supplement to that valuable publication would result.

In order to estimate approximately the extent of this venture the titles recorded in the first 10 issues of the Current List which were copied from periodicals not included among those from which the Index Medicus was compiled were counted and found to approximate 2,800. Since the total number of titles recorded in these 10 numbers is 10,850, this indicates about 35 per cent more references in the Current List than the number used in the preparation of the Index Medicus. Naturally a very large proportion of these are from foreign language journals which are less widely circulated in America than the journals which are covered by Index Medicus. It is also possible that a large number of these papers are of less importance than those in the journals more commonly circulated in this country. However, for the sake of completeness, it is evident that their indexing would be useful to those wishing to make very exhaustive studies of the medical literature.

Calculating for the entire year, there would be approximately 15,000 titles in addition to those from which the Quarterly Cumulative Index Medicus is prepared. If only two lines were needed to index each of these, the supplementary index so made would occupy about 175 pages. Although this would tax the resources which are at present available for the Current List, the project appears to be of sufficient importance to medical research to warrant an effort towards its accomplishment. Fortunately the typed copy for which the succeeding issues of the Current List were reproduced has been kept and it will be possible to use it in transferring to cards and properly classifying and arranging the references with the minimum amount of labor. It is possible that it may be necessary to make an extra charge to cover the cost of preparing and printing this index, but this will be avoided if possible.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is $5.00 per year in the United States and $5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at $1.00 per year.
